Subject Index of Volume 54

Acidic sites
in heterogeneous catalysis: structure, properties and activity, 312
Acids
DNA cleavage using semiconductor-photocatalysts, 1
effect of solvent on kinetics of hydration of 2-methylpropene catalyzed by strong acid ion exchangers, 183
influence of hydrogen chloride treatment on dispersion of Ni particles supported on carbon, 225
metal-catalyzed reaction of β-dicarbonyls with ethyl cyanoformate: new approach to synthesis of unsaturated amino acid derivatives, 73
simple and mild method for direct metal-catalyzed carbonylation of allyl alcohols to, L33
Alcohols
allyl; simple and mild method for direct metal-catalyzed carbonylation of, to acids, L33
kinetics and thermodynamics of homogeneous oxidation of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45
quantum chemical studies on mechanism of conversion of, on zeolites, 444
Alkanes
alkene and dihydrogen formation by catalytic dehydrogenation of alkane with $RhCl(PR_3)_2$ photogenerated from $RhCl(CO)(PR_3)_2$, 57
precursor effect on hydrogenolysis of methylcyclopentane over supported Ru, 205
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
Alkenes, Olefins
alkene and dihydrogen formation by catalytic dehydrogenation of alkane with $RhCl(PR_3)_2$ photogenerated from $RhCl(CO)(PR_3)_2$, 57
alkene epoxidation with iodosylbenzene catalyzed by mono and binuclear Mn(II)–Schiff base complexes, 131
catalytic reactions of methyl formate with, 95
comparison of catalytic activity of Pd and Pt complexes of ferrocenyl amine sulphides towards selective hydrogenation of cyclooctadiene to cyclooctene, L27
effect of solvent on kinetics of hydration of 2-methylpropene catalyzed by strong acid ion exchangers, 183
hydrogenolysis of triphenylphosphine coordinated to transition metals in hydrogenation of olefin by hydrogen transfer from organic compounds, 31
Ni(0)-catalyzed cyclo-co-oligomerization of allene with CO_2, L9
1-pentene hydroformylation using mixed-metal cluster $Fe_2Co_2(CO)_{11}(\mu_4\text{-}PPh)_2$: cylindrical internal reflectance evidence for cluster catalysis, 199
reactions of π-allylic complexes of Pd with methyl formate, 37
secondary reactions of primary products of Fischer–Tropsch synthesis:
role of butene, 119
role of propene, 103
selective hydrogenation of, catalyzed by Cp_2TiCl_2–^{i}PrMgBr, L19
thermodynamics of homogeneous hydrogenation:
of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171

© Elsevier Sequoia/Printed in The Netherlands

effects of secondary ligand on catalytic properties in homogeneous hydrogenation of cyclohexene by some water soluble Ru complexes, 81
Alkynes
mechanism of 2-hexyne hydrogenation on heterogeneous Pd, 243
Amino acid derivatives
unsaturated: new approach to synthesis of; metal-catalyzed reaction of β-dicarbonyls with ethyl cyanoformate, 73
Amorphous silica
silanol as model for free hydroxyl of: comparison between experimental and calculated *ab initio* vibrational features, 439
Antimony
effects of cation substitution in Sb—Sn—M—O (M = Fe, Cu) oxidation type catalysts, 263
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
Aromatic compounds
alkene epoxidation with iodosylbenzene catalyzed by mono and binuclear Mn(II)–Schiff base complexes, 131
carbonylation of benzyl chloride catalyzed by water-soluble palladium phosphine complex in two-phase system, 65
convenient preparation of axially chiral 1,1′-binaphthyl-2-carboxylates via Pd-catalyzed carbonylation of 1,1′-binaphthyl-2-yl, L5
hydrogenolysis of triphenylphosphine coordinated to transition metals in hydrogenation of olefin by hydrogen transfer from organic compounds, 31
hydrosilylation of α-methylstyrene and ketones catalyzed by Group 10 and Rh isocyanide complexes, 165
1-pentene hydroformylation using mixed-metal cluster $Fe_2Co_2(CO)_{11}(\mu_4\text{-}PPh)_2$: cylindrical internal reflectance evidence for cluster catalysis, 199
thermal oscillations during catalytic hydrogenation of nitrobenzene, 237
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
Arsenic
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
Ascorbate
kinetics and thermodynamics of homogeneous oxidation of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45

Bioreactor flow kinetics
of covalently immobilized trypsin on Fractogel support, 147

Carbon dioxide
Ni(0)-catalyzed cyclo-co-oligomerization of allene with, L9
Carbon monoxide
Fischer–Tropsch synthesis on iron-based catalysts: effect of CO-feeding small oxygenates, 213
hydrogenation: quantum chemical study on mechanism of, to oxygenates over V-promoted Rh catalyst, 478
Carbonylation
of benzyl chloride catalyzed by water-soluble palladium phosphine complex in two-phase system, 65
direct metal-catalyzed; simple and mild method for, of allyl alcohols to acids, L33
Pd-catalyzed, of 1,1′-binaphthyl-2-yl; convenient preparation of axially chiral 1,1′-binaphthyl-2-carboxylates via, L5
Chemisorption
hydrogen; size dependence in, on Ni(100), 406
quantum theory of, 281

Cluster catalysis
cylindrical internal reflectance evidence for; 1-pentene hydroformylation using mixed-metal cluster $Fe_2Co_2(CO)_{11}(\mu_4\text{-}PPh)_2$, 199
Cobalt
homogeneous multimetallic catalysts: hydroformylation of norbornene by Co–Ru bimetallic catalyst, L13
1-pentene hydroformylation using mixed-metal cluster $Fe_2Co_2(CO)_{11}(\mu_4\text{-}PPh)_2$: cylindrical internal reflectance evidence for cluster catalysis, 199
Condensation
selective catalytic self-, of acetone, 9
Copper
effects of cation substitution in Sb—Sn—M—O (M = Fe, Cu) oxidation type catalysts, 263

Dehydrogenation
catalytic; alkene and dihydrogen formation by, of alkane with $RhCl(PR_3)_2$ photogenerated from $RhCl(CO)(PR_3)_2$, 57
Dicarbonyls
β-: metal-catalyzed reaction of, with ethyl cyanoformate; new approach to synthesis of unsaturated amino acid derivatives, 73
Dihydrogen
and alkene formation by catalytic dehydrogenation of alkane with $RhCl(PR_3)_2$ photogenerated from $RhCl(CO)(PR_3)_2$, 57
Dioxygen
metal-dependent reactivity of some metalloporphyrins in oxidation with, 451
Dispersed metal state
highly dispersed metal state — physical and chemical properties, 389
Dispersion
influence of hydrogen chloride treatment on, of Ni particles supported on carbon, 225
DNA cleavage
using semiconductor-photocatalysts, 1

Electrocatalysis
some theoretical problems in, with charge transfer, 353
Electron localization
d; some peculiarities of, in real space of oxide catalysts, 490
Energetics
of metal–surface reactions: back-of-envelope theoretical modelling, 301
Enzyme reactions
sensitive investigation method for influence of magnetic fields on, L1
Enzymes
bioreactor flow kinetics of covalently immobilized trypsin on Fractogel support, 147
kinetics and thermodynamics of homogeneous oxidation of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45
Epoxidation
alkene, with iodosylbenzene catalyzed by mono and binuclear Mn(II)–Schiff base complexes, 131
Ethyl cyanoformate
metal-catalyzed reaction of β-dicarbonyls with: new approach to synthesis of unsaturated amino acid derivatives, 73

Formates
catalytic reactions of methyl formate with olefins, 95
metal-catalyzed reaction of β-dicarbonyls with ethyl cyanoformate: new approach to synthesis of unsaturated amino acid derivatives, 73
reactions of π-allylic complexes of Pd with methyl formate, 37
Fractogel support
bioreactor flow kinetics of covalently immobilized trypsin on, 147

Hydration
effect of solvent on kinetics of, of 2-methylpropene catalyzed by strong acid ion exchangers, 183
Hydroformylation
of norbornene by Co–Ru bimetallic catalyst; homogeneous multimetallic catalysts, L13
1-pentene, using mixed-metal cluster $Fe_2Co_2(CO)_{11}(\mu_4\text{-}PPh)_2$: cylindrical internal reflectance evidence for cluster catalysis, 199
Hydrogen
size dependence in hydrogen chemisorption on Ni(100), 406

Hydrogenation
catalytic; thermal oscillations during, of nitrobenzene, 237
CO; quantum chemical study on mechanism of, to oxygenates over V-promoted Rh catalyst, 478
2-hexyne, on heterogeneous Pd; mechanism of, 243
homogeneous, of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane; thermodynamics of, 171
homogeneous: effects of secondary ligand on catalytic properties in, of cyclohexene by some water soluble Ru complexes; thermodynamics of, 81
hydrogenolysis of triphenylphosphine coordinated to transition metals in, of olefin by hydrogen transfer from organic compounds, 31
selective; comparison of catalytic activity of Pd and Pt complexes of ferrocenyl amine sulphides towards, of cyclooctadiene to cyclooctene, L27
selective, of olefins catalyzed by Cp_2TiCl_2–^{i}PrMgBr, L19
Hydrogen chloride treatment
influence of, on dispersion of Ni particles supported on carbon, 225
Hydrogenolysis
precursor effect on, of methylcyclopentane over supported Ru, 205
of triphenylphosphine coordinated to transition metals in hydrogenation of olefin by hydrogen transfer from organic compounds, 31
Hydrogen peroxide
kinetics and mechanism of reaction of, with $K[Ru^{III}(PDTA{-}H)Cl]\cdot 2H_2O$ and $K[Ru^{III}(HEDTA{-}H)Cl]$, 139
kinetics and thermodynamics of homogeneous oxidation of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45
Hydrosilylation
of α-methylstyrene and ketones catalyzed by Group 10 and Rh isocyanide complexes, 165
Immobilization
bioreactor flow kinetics of covalently immobilized trypsin on Fractogel support, 147
Interaction energies
and self-diffusion coefficient of water in ferrierite from molecular dynamics simulation; effects of long-range interactions in zeolite-like systems, 426
Interdisciplinary field of research
— catalysis, 370
Iron
comparison of catalytic activity of Pd and Pt complexes of ferrocenyl amine sulphides towards selective hydrogenation of cyclooctadiene to cyclooctene, L27
effects of cation substitution in Sb—Sn—M—O (M = Fe, Cu) oxidation type catalysts, 263
effects of long-range interactions in zeolite-like systems: interaction energies and self-diffusion coefficient of water in ferrierite from molecular dynamics simulation, 426
Fischer–Tropsch synthesis on iron-based catalysts: effect of CO-feeding small oxygenates, 213
1-pentene hydroformylation using mixed-metal cluster $Fe_2Co_2(CO)_{11}$-$(\mu_4$-$PPh)_2$: cylindrical internal reflectance evidence for cluster catalysis, 199
Isomers
ab initio calculations on three isomers of LiC_2H_2, 417

Ketones
hydrosilylation of α-methylstyrene and ketones catalyzed by Group 10 and Rh isocyanide complexes, 165
selective catalytic self-condensation of acetone, 9

Lithium
ab initio calculations on three isomers of LiC_2H_2, 417

Magnesium
MgH_2 as reducing agent: reduction of organic halides in presence of Ni(0) and Pd(0) complexes, L23
selective hydrogenation of olefins catalyzed by Cp_2TiCl_2–^{i}PrMgBr, L19

Magnetic fields
sensitive investigation method for influence of, on enzyme reactions, L1
Manganese
alkene epoxidation with iodosylbenzene catalyzed by mono and binuclear Mn(II)–Schiff base complexes, 131
Metalloporphyrins
metal-dependent reactivity of some, in oxidation with dioxygen, 451
Methyl formate
catalytic reactions of, with olefins, 95
reactions of π-allylic complexes of Pd with, 37
Molecular charge distribution
basic concepts and illustrative applications of sensitivity analysis of, 324
Molecular dynamics simulation
interaction energies and self-diffusion coefficient of water in ferrierite from; effects of long-range interactions in zeolite-like systems, 426
Molecular orbital calculation
CNDO-S^2: new semiempirical SCF MO method for transition metal organometallics, 462

Nickel
influence of hydrogen chloride treatment on dispersion of Ni particles supported on carbon, 225
MgH_2 as reducing agent: reduction of organic halides in presence of Ni(0) and Pd(0) complexes, L23
Ni(0)-catalyzed cyclo-co-oligomerization of allene with CO_2, L9
size dependence in hydrogen chemisorption on Ni(100), 406
Norbornene
hydroformylation of, by Co–Ru bimetallic catalyst; homogeneous multimetallic catalysts, L13

Olefins: see Alkenes
Oligomerization
Ni(0)-catalyzed cyclo-co-, of allene with CO_2, L9
Orbital
CNDO-S^2: new semiempirical SCF MO method for transition metal organometallics, 462
some peculiarities of d electron localization in real space of oxide catalysts, 490
X_α-SW estimation of degree of localization of 3d and 2p states in transition metal oxides, 484
Organic halides
reduction of, in presence of Ni(0) and Pd(0) complexes; MgH_2 as reducing agent, L23
Oxidation
effects of cation substitution in Sb—Sn—M—O (M = Fe, Cu) oxidation type catalysts, 263
homogeneous; kinetics and thermodynamics of, of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45
metal-dependent reactivity of some metalloporphyrins in, with dioxygen, 451
Oxygenates
Fischer–Tropsch synthesis on iron-based catalysts: effect of CO-feeding small oxygenates, 213
quantum chemical study on mechanism of CO hydrogenation to, over V-promoted Rh catalyst, 478

Palladium
carbonylation of benzyl chloride catalyzed by water-soluble palladium phosphine complex in two-phase system, 65
comparison of catalytic activity of Pd and Pt complexes of ferrocenyl amine sulphides towards selective hydrogenation of cyclooctadiene to cyclooctene, L27
convenient preparation of axially chiral 1,1′-binaphthyl-2-carboxylates via Pd-catalyzed carbonylation of 1,1′-binaphthyl-2-yl, L5
mechanism of 2-hexyne hydrogenation on heterogeneous Pd, 243
MgH_2 as reducing agent: reduction of organic halides in presence of Ni(0) and Pd(0) complexes, L23
reactions of π-allylic complexes of, with methyl formate, 37
Phosphorus
carbonylation of benzyl chloride catalyzed by water-soluble palladium phosphine complex in two-phase system, 65

hydrogenolysis of triphenylphosphine coordinated to transition metals in hydrogenation of olefin by hydrogen transfer from organic compounds, 31
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
Photocatalysts
semiconductor; DNA cleavage using, 1
Platinum
comparison of catalytic activity of Pd and Pt complexes of ferrocenyl amine sulphides towards selective hydrogenation of cyclooctadiene to cyclooctene, L27
Porphyrins
metal-dependent reactivity of some metalloporphyrins in oxidation with dioxygen, 451
Potassium
kinetics and mechanism of reaction of H_2O_2 with $K[Ru^{III}(PDTA—H)Cl]\cdot 2H_2O$ and $K[Ru^{III}(HEDTA—H)Cl]$, 139

Quantum chemical concepts
in heterogeneous catalysis, 288
Quantum chemical studies
on mechanism of CO hydrogenation to oxygenates over V-promoted Rh catalyst, 478
on mechanism of conversion of alcohols on zeolites, 444
Quantum theory
of chemisorption, 281

Reduction
of organic halides in presence of Ni(0) and Pd(0) complexes; MgH_2 as reducing agent, L23
Reversible reactions
role of model heterogeneous gas–solid phase, in heterogeneous catalysis, 496
Rhodium
alkene and dihydrogen formation by catalytic dehydrogenation of alkane with $RhCl(PR_3)_2$ photogenerated from $RhCl(CO)(PR_3)_2$, 57
hydrosilylation of α-methylstyrene and ketones catalyzed by Group 10 and Rh isocyanide complexes, 165
quantum chemical study on mechanism of CO hydrogenation to oxygenates over V-promoted Rh catalyst, 478
thermodynamics of homogeneous hydrogenation of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
Ruthenium
homogeneous multimetallic catalysts: hydroformylation of norbornene by Co–Ru bimetallic catalyst, L13
kinetics and mechanism of reaction of H_2O_2 with $K[Ru^{III}(PDTA—H)Cl]\cdot 2H_2O$ and $K[Ru^{III}(HEDTA—H)Cl]$, 139
kinetics and thermodynamics of homogeneous oxidation of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45
precursor effect on hydrogenolysis of methylcyclopentane over supported Ru, 205
thermodynamics of homogeneous hydrogenation: effects of seccondary ligand on catalytic properties in homogeneous hydrogenation of cyclohexene by some water soluble Ru complexes, 81

Schiff base complexes
mono and binuclear Mn(II)–; alkene epoxidation with iodosylbenzene catalyzed by, 131
Self-condensation
selective catlaytic, of acetone, 9
Self-diffusion coefficient
and interaction energies of water in ferrierite from molecular dynamics simulation; effects of long-range interactions in zeolite-like systems, 426
Semiconductor-photocatalysts
DNA cleavage using, 1
Sensitivity analysis
basic concepts and illustrative applications of, of molecular charge distribution, 324

Silicon
silanol as model for free hydroxyl of amorphous silica: comparison between experimental and calculated *ab initio* vibrational features, 439
Surface
energetics of metal–surface reactions: back-of-the-envelope theoretical modelling, 301
science and catalysis, 343
Synthesis
new approach to, of unsaturated amino acid derivatives; metal-catalyzed reaction of β-dicarbonyls with ethyl cyanoformate, 73
Fischer–Tropsch:
on iron-based catalysts: effect of CO-feeding small oxygenates, 213
secondary reactions of primary products of; role of butene, 119
secondary reactions of primary products of; role of propene, 103

Theoretical modelling
back-of-the-envelope: energetics of metal–surface reactions, 301
Theoretical problems
some, in electrocatalysis with charge transfer, 353
Thermal oscillations
during catalytic hydrogenation of nitrobenzene, 237
Thermodynamics
of homogeneous hydrogenation:
of cyclohexene catalyzed by Rh(I) complexes of monodentate ligands $SbPh_3$, $AsPh_3$ and bidentate (As, P) ligand 1,2-diphenylphosphino-1,2-diphenylarsinoethane, 171
effects of secondary ligand on catalytic properties in homogeneous hydrogenation of cyclohexene by some water soluble Ru complexes, 81
and kinetics of homogeneous oxidation of cyclohexanol to *cis*-1,3-cyclohexanediol by Ru(III) analogue of model peroxidase system: Ru(III)–EDTA–ascorbate–H_2O_2, 45
Tin
effects of cation substitution in Sb—Sn—M—O (M = Fe, Cu) oxidation type catalysts, 263
Titanium
selective hydrogenation of olefins catalyzed by Cp_2TiCl_2–$^{i}PrMgBr$, L19
Transition metal organometallics
CNDO-S^2: new semiempirical SCF MO method for, 462
Transition metal oxides
X_α-SW estimation of degree of localization of 3d and 2p states in, 484

Vanadium
quantum chemical study on mechanism of CO hydrogenation to oxygenates over V-promoted Rh catalyst, 478
Vibrational features
experimental and calculated *ab initio*: comparison between; silanol as model for free hydroxyl of amorphous silica, 439

Water
carbonylation of benzyl chloride catalyzed by water-soluble palladium phosphine complex in two-phase system, 65
effects of long-range interactions in zeolite-like systems: interaction energies and self-diffusion coefficient of water in ferrierite from molecular dynamics simulation, 426
thermodynamics of homogeneous hydrogenation: effects of secondary ligand on catalytic properties in homogeneous hydrogenation of cyclohexene by some water soluble Ru complexes, 81

X_α-SW estimation
of degree of localization of 3d and 2p states in transition metal oxides, 484

Zeolites
effects of long-range interactions in zeolite-like systems: interaction energies and self-diffusion coefficient of water in ferrierite from molecular dynamics simulation, 426
quantum chemical studies on mechanism of conversion of alcohols on, 444
